

# 3 different situations... 1 problem !

# Who we are

**Lamine Gueye**

**David Mosquera**

**Sébastien Dubé**

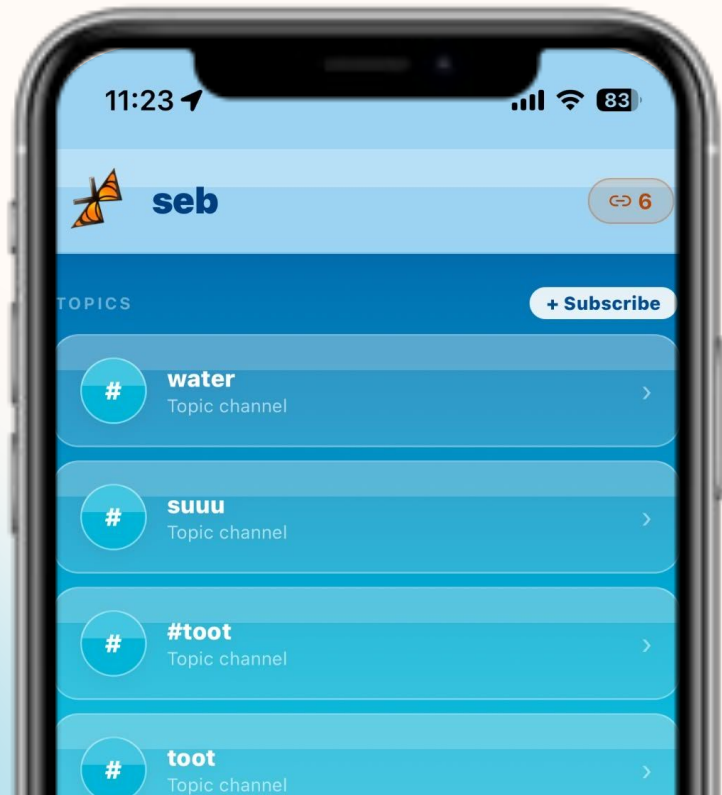

**And we present to you...**

**No internet. No towers. No servers.**

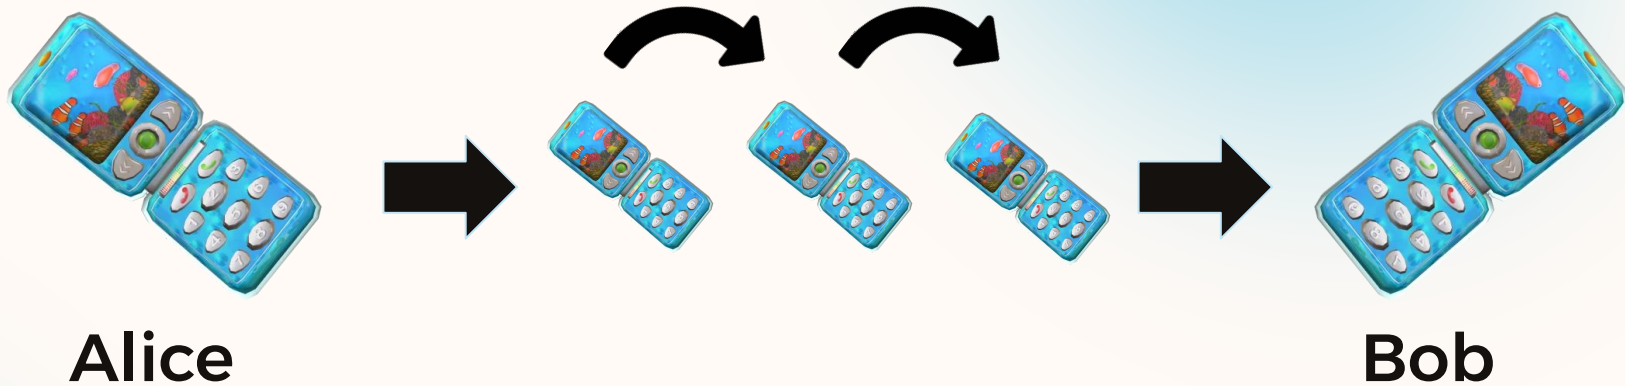

# Our Offline messaging solution

Powered by a mesh network

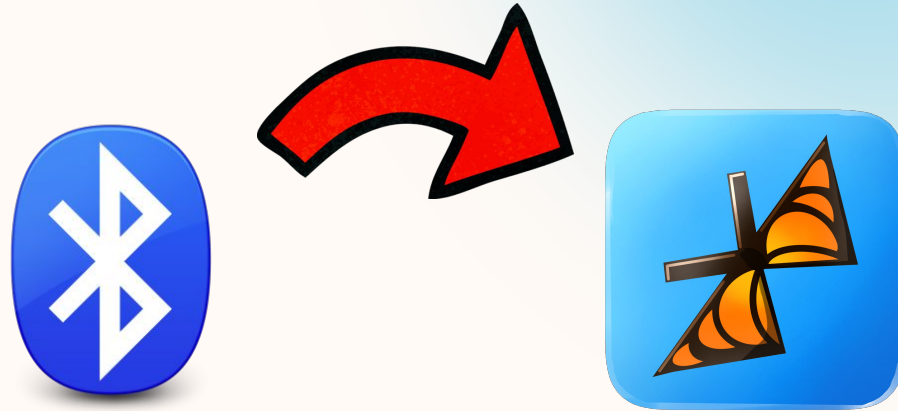

# But how does it work ?

But how do we implement this algorithm ? The answer is...

# Bluetooth implementation !!

# Features of the toot app !

Encrypted Direct Messaging

Broadcast

Contacts

Location Sharing

Topics

Meeting Points

**DEMO**

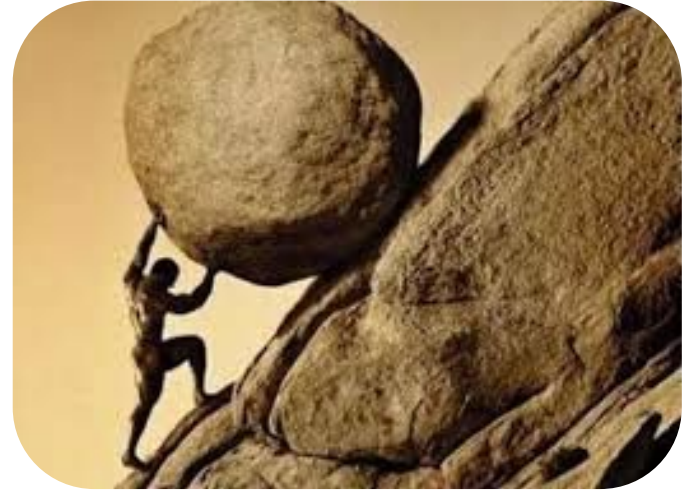

# Our main challenges

Building for Mobile

Cross platform logic

Groupchats and shared encryption

Bluetooth incident...

# When is our app needed ?

Need for it in social events

Failsafe

Safety in emergency situations

**But... adoption is key !!!**

# Current limitations

Max Payload

Connection scanning

Background throttling (IOS)

Nickname spoofing

No key rotation

***Pass it on***

**Merci !**  
**Thank you !**
